20. ABSTRACT (Continue on reverse side if necessary and identify by block number) The primary objective was to develop a "standard and acceptable measurement methodology" which may be applied to the official seven Total Army Goals. Readiness and Leadership goals were used as a pilot test. The principal methodology employed was a hierarchical valuated state space. The state space is a process whereby the person(s) responsible for defining the purpose or goal to be evaluated defines a set of parameters such that the		

UNCLASSIFIED

SECURITY CLASSIFICATION OF THIS PAGE(When Data Entered)

designated parameters are the primary consideration (degrees of freedom) that impact directly on the achievement of the overall objective. Each parameter is attributed some relative importance and is further subdivided into mutually exclusive class intervals which indicate differences in the degree of achievement of that parameter. The class intervals span the range from the most to the least desirable condition. Each class interval is then attributed some relative worth for that degree of achievement. Finally, a normalizing function is applied so that some overall worth can be associated with each cell in this discrete, multi-attribute state space.

A series of structured interviews with approximately 15 ARSTAF subject matter experts was conducted to define the respective goal parameters.

It was determined that a quantified measure of the goals was possible for both monitoring progress and directing investment of resources toward goal attainment. However, utility of the results and methodology was not considered acceptable. Principal criticism was that the method was not considered practical, was unduly complicated and would require virtually a totally new mind set for action-taking in support of the Total Army Goals.

TOTAL ARMY GOALS

READINESS

A TOTAL ARMY PREPARED FOR THE "THREE DAYS OF WAR":
TO DETER THE DAY BEFORE WAR; TO FIGHT AND WIN ON
THE DAY OF WAR; AND TO TERMINATE CONFLICT IN SUCH
A MANNER THAT ON THE DAY AFTER WAR, THE UNITED
STATES AND ITS ALLIES HAVE AN ACCEPTABLE LEVEL OF
SECURITY.
